SKILLS

BACKEND
Java 11/17/21 · Spring Boot · Spring Security · Spring Batch · JPA/Hibernate · Microservices · REST y SOAP · Maven · Oracle · PostgreSQL · MySQL

AWS & DEVOPS
AWS (DynamoDB, SQS + DLQ, S3, CloudFront, Secrets Manager, Parameter Store, IAM) · Docker · Kubernetes · GitLab CI/CD · Linux (Ubuntu Server) · Nginx

FRONTEND
Next.js · React · Angular · TypeScript · HTML5 · CSS3 · Tailwind CSS

QUALITY & DELIVERY
JUnit 5 · Mockito · SonarQube · Fortify SAST · GitFlow · Git

TOOLS
IntelliJ IDEA · VS Code · Postman · DBeaver · Jira · New Relic · Claude Code

IN PROGRESS
Software architecture · Cloud-native design · Event-driven · Terraform · Kafka / SNS · Spring Cloud

SOFT SKILLS
Team leadership · Client communication · Delivery estimation · Time management · Technical documentation

LANGUAGES

Spanish — Native

English — B2

PROFILE

Full-stack developer with almost four years of professional experience in software support and development. Currently on a cloud-native banking platform in production: microservices in Java and Spring Boot on AWS (DynamoDB, SQS, S3, Secrets Manager), Kubernetes and GitLab CI/CD, plus a Next.js frontend. Previously, legacy and modern systems with REST and SOAP services. Software Engineering graduate (degree pending) and software programming technician.

EXPERIENCE

Full-Stack Developer · Ginko Financial Solutions 2026 →

A banking cash-management platform: cloud-native, highly available and in production for several banks. Full cycle: analysis, development, testing and deployment through CI/CD pipelines.

- Microservices and workers in Java 17/21 and Spring Boot 3, with SQS queues, Dead Letter Queues and DynamoDB.
- Migration of more than 12 microservices to AWS Secrets Manager and Parameter Store (naming convention, fail-fast).
- Designed an S3 + CloudFront + Parameter Store solution to update browser monitoring without redeploying.
- Next.js 14 and TypeScript frontend: Google Analytics 4, CSRF vulnerability fixes, Docker image 1.1 GB lighter.
- Quality and delivery: JUnit 5, Mockito, SonarQube (19 artifacts) and ReDoS fixes; GitLab CI/CD pipelines and hotfixes with cherry-picks across branches.
- Applied AI: custom Claude Code workflows for estimation, bug analysis and documentation.
- During a period without a technical lead I coordinated the team: delivery estimation, releases, documentation and client meetings.

Support and Software Development Engineer · Megasoft 2024 – 2026

Development and support of enterprise Java applications.

- Development and maintenance of legacy and modern systems applying good practices.
- Integration and consumption of REST and SOAP services.
- Version control with Git and GitLab, and technical support for production applications.

Support Engineer · Bluechemical 2023 – 2024

Technical support and software development for a chemicals distribution company.

- Built AutoFacSigo: catalog with shopping cart, dashboard with charts and automatic Siigo invoice capture with Selenium.
- Deployed the platform with Docker and provided technical support to operations.

PERSONAL PROJECTS

AutoFacSigo Java · Spring Boot · Angular · MySQL · Docker

Full-stack platform with catalog, shopping cart, dashboard with charts and Siigo invoice capture with Selenium.

Foro Good Java · Spring Boot · Angular · MySQL

Online forum with user registration and JWT authentication.

Online Bookstore Java · Spring Boot · Angular

Bookstore with PayPal API payments and JWT.

EDUCATION

Software Engineering 2024 – 2026

UNIMINUTO · coursework completed, degree pending

Software Programming Technician 2022 – 2024

SENA

Certifications

Spring Boot with Java (Oracle Next Education · Alura) · JavaScript (freeCodeCamp)
